

# Manufactory of Notre Dame

South-Máttra region, Hungary

## Our goals

### Goals for the South-Máttra

#### Mission:

- developing the mission step -by-step, constantly monitoring the needs of the local communities;
- involving more sisters, possibly the whole of the Province in the long term;
- reaching more volunteers – this works best through personal engagement
- connecting our university-age students to this project, providing trainings and mentoring for the volunteers

### Goals for the Manufactory of Notre Dame:

- developing technical skills,
- building our own website and webshop
- creating online and print brochures and publications
- establishing an independent civil society organization or fund for those working in the manufactory or willing to join our work
- seeking sales opportunities,
- collaboration with young designers, manufacturing women's clothes by unique designs,

## Education and opportunities for the poor

Manufactory  
of Notre Dame

is an organically developing project of the Hungarian Province of the School Sisters of Notre Dame. It is part of their bigger project, the Máttraalja Misszió (South-Matra Mission), brought forth in collaboration with civil society organizations.

Its purpose is to give the opportunity of employment and professional training and development for the inhabitants of the economically challenged region of the South-Máttra in Hungary and, according to our plans, give them the long-term chance of self-sufficiency.
